Santa Clara County Actual & Projected Public School Enrollment

- We have over 45,000 students **fewer** countywide than we did in the 2014-2015 school year
- Enrollment projections from the California Department of Finance show the trend will continue, **if we're not able to make significant changes**, for a 20-year total enrollment decline of 36%, or nearly 73,000 fewer students.

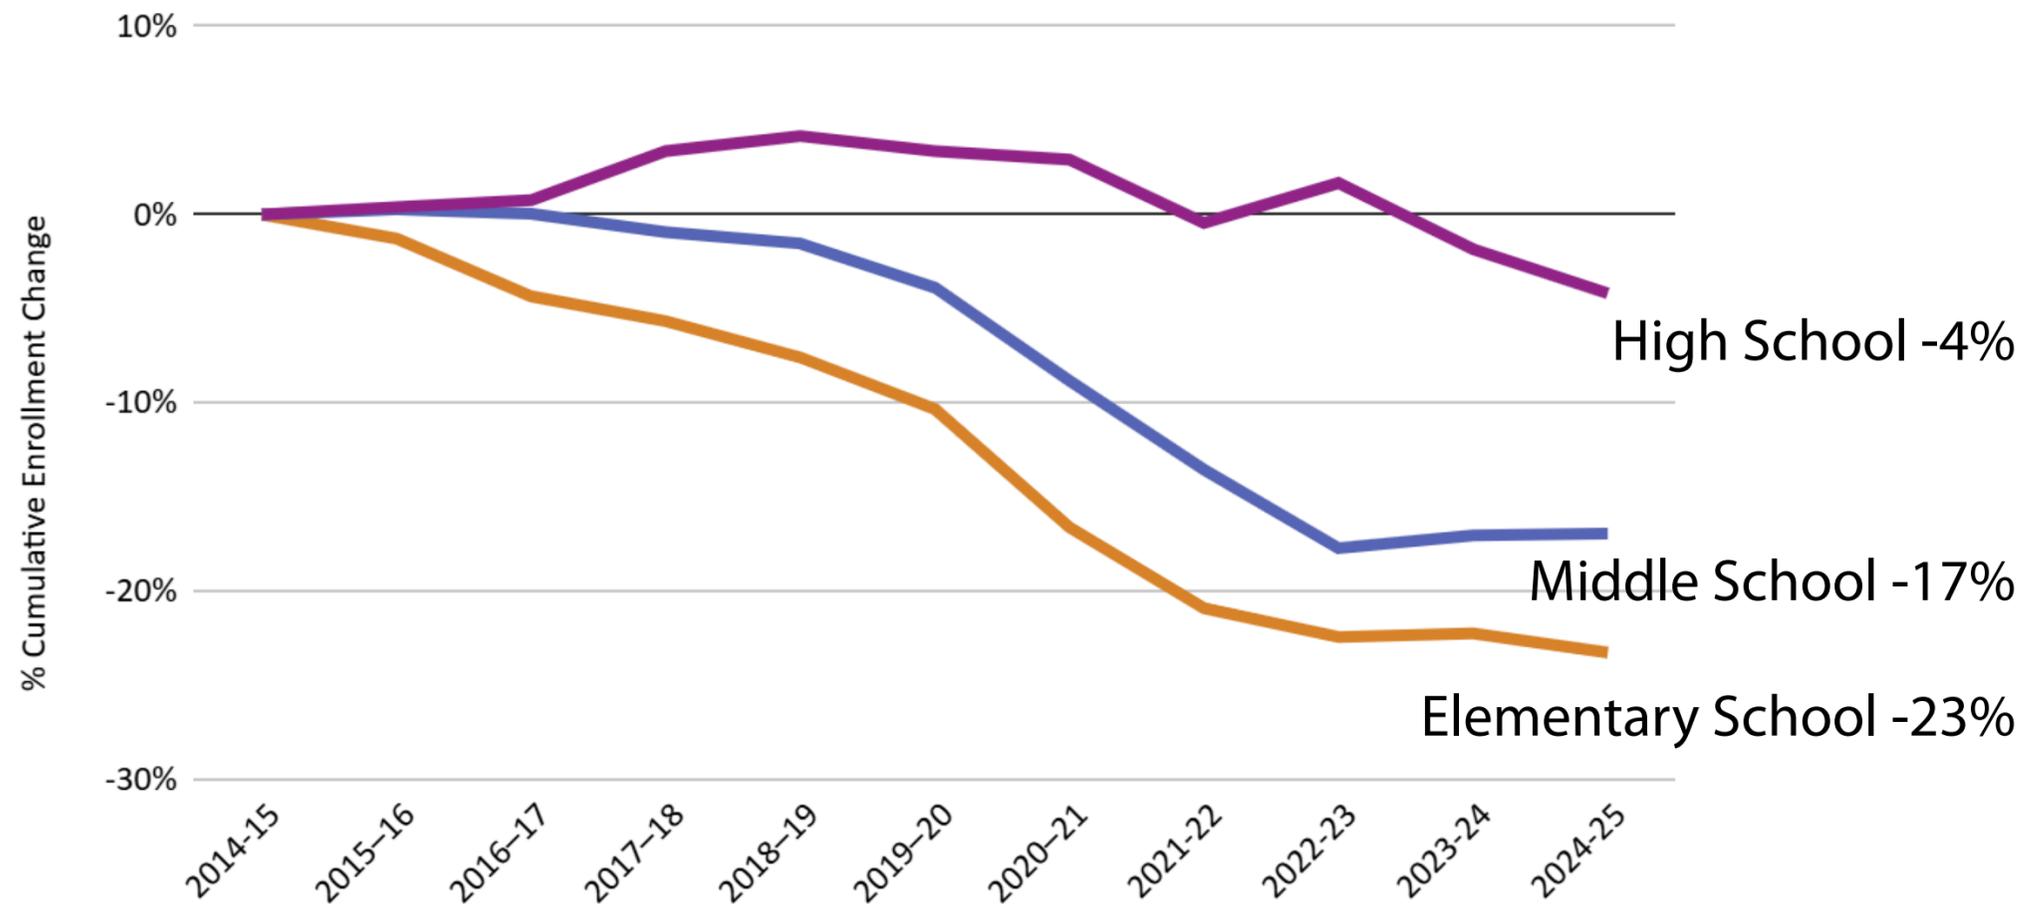

Enrollment is Changing Across All School Types in Santa Clara County

- Students are not moving from traditional public to charter & private schools in significant numbers
- Modest 5% gain in private schools from 2014 to 2025- but only about 2,000 students.
- 2,000 students gone from charter schools, more than 43,000 students from traditional public schools, where most students are enrolled.

Enrollment Changes Are Worst for Younger Students

- TK-5th grade has the largest drop in enrollment
- Income pressures are often higher for families with younger children/ earlier careers, leading to more displacement
- A sign of what's to come: as smaller groups of elementary and middle-school aged children move into high school, larger enrollment drops will moving up with them

Why Are People **Having Fewer Children?**

- While there are many reasons people might choose not to have kids, 41% of adults ages 18-39 who don't have children say **they can't afford to have a child.**
- **Rising home values are linked to lower birth rates;** they represent the largest component of the cost of raising a child. This leads couples to delay childbearing or have fewer children.
- **Changes in house prices have a larger effect on current period birth rates** than changes in unemployment rates.

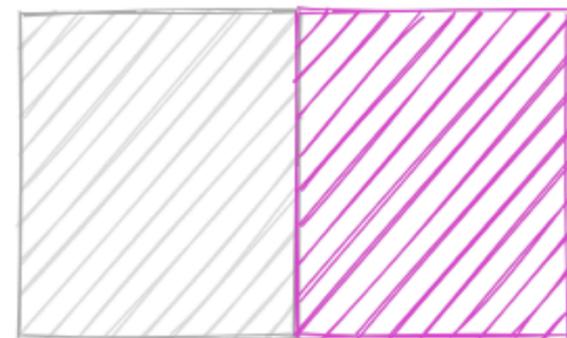

The Cost of Raising a Child

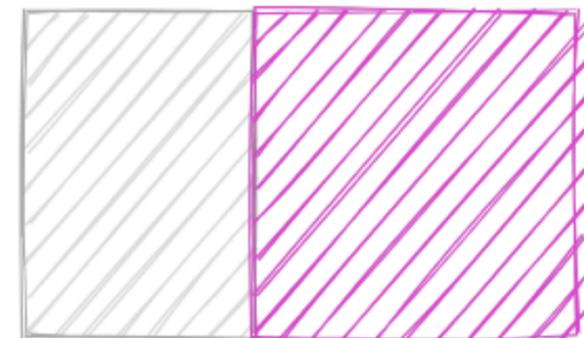

In Santa Clara County, a family of two would need to **increase their income by 52%**, for a total of \$148,600 per year, to maintain their standard of living **after having their first child.**

Raising **two children** requires a **98%** increase in income

Raising **three children** requires a **140%** increase in income

Raising **four children** requires a **157%** increase in income

Higher Housing Cost Means Fewer Children Born

Each dot represents one county

20 births per 1,000

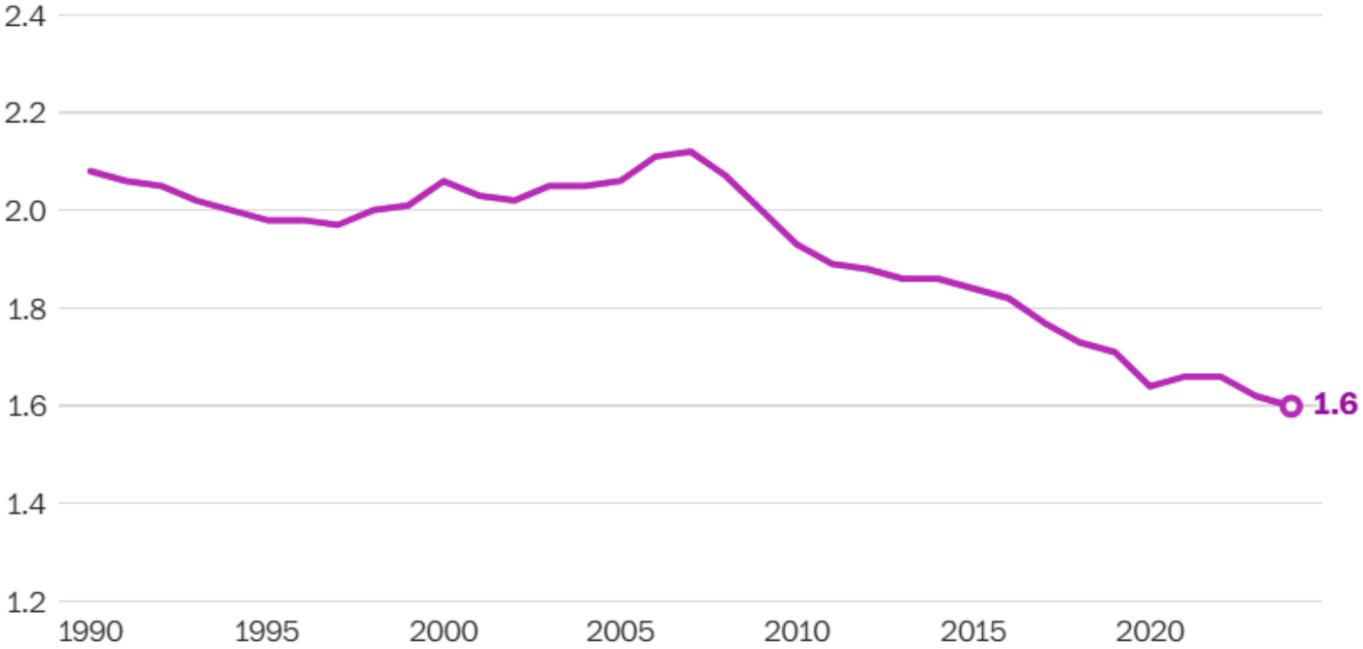

Birth rates are available for counties with populations of more than 100,000. Only 580 counties are shown.
Source: Author's analysis of data from CDC and Economic Policy Institute

Birth rates are lower in areas where raising children takes a bigger share of a family's income.

The U.S. fertility rate reached a record low in 2024

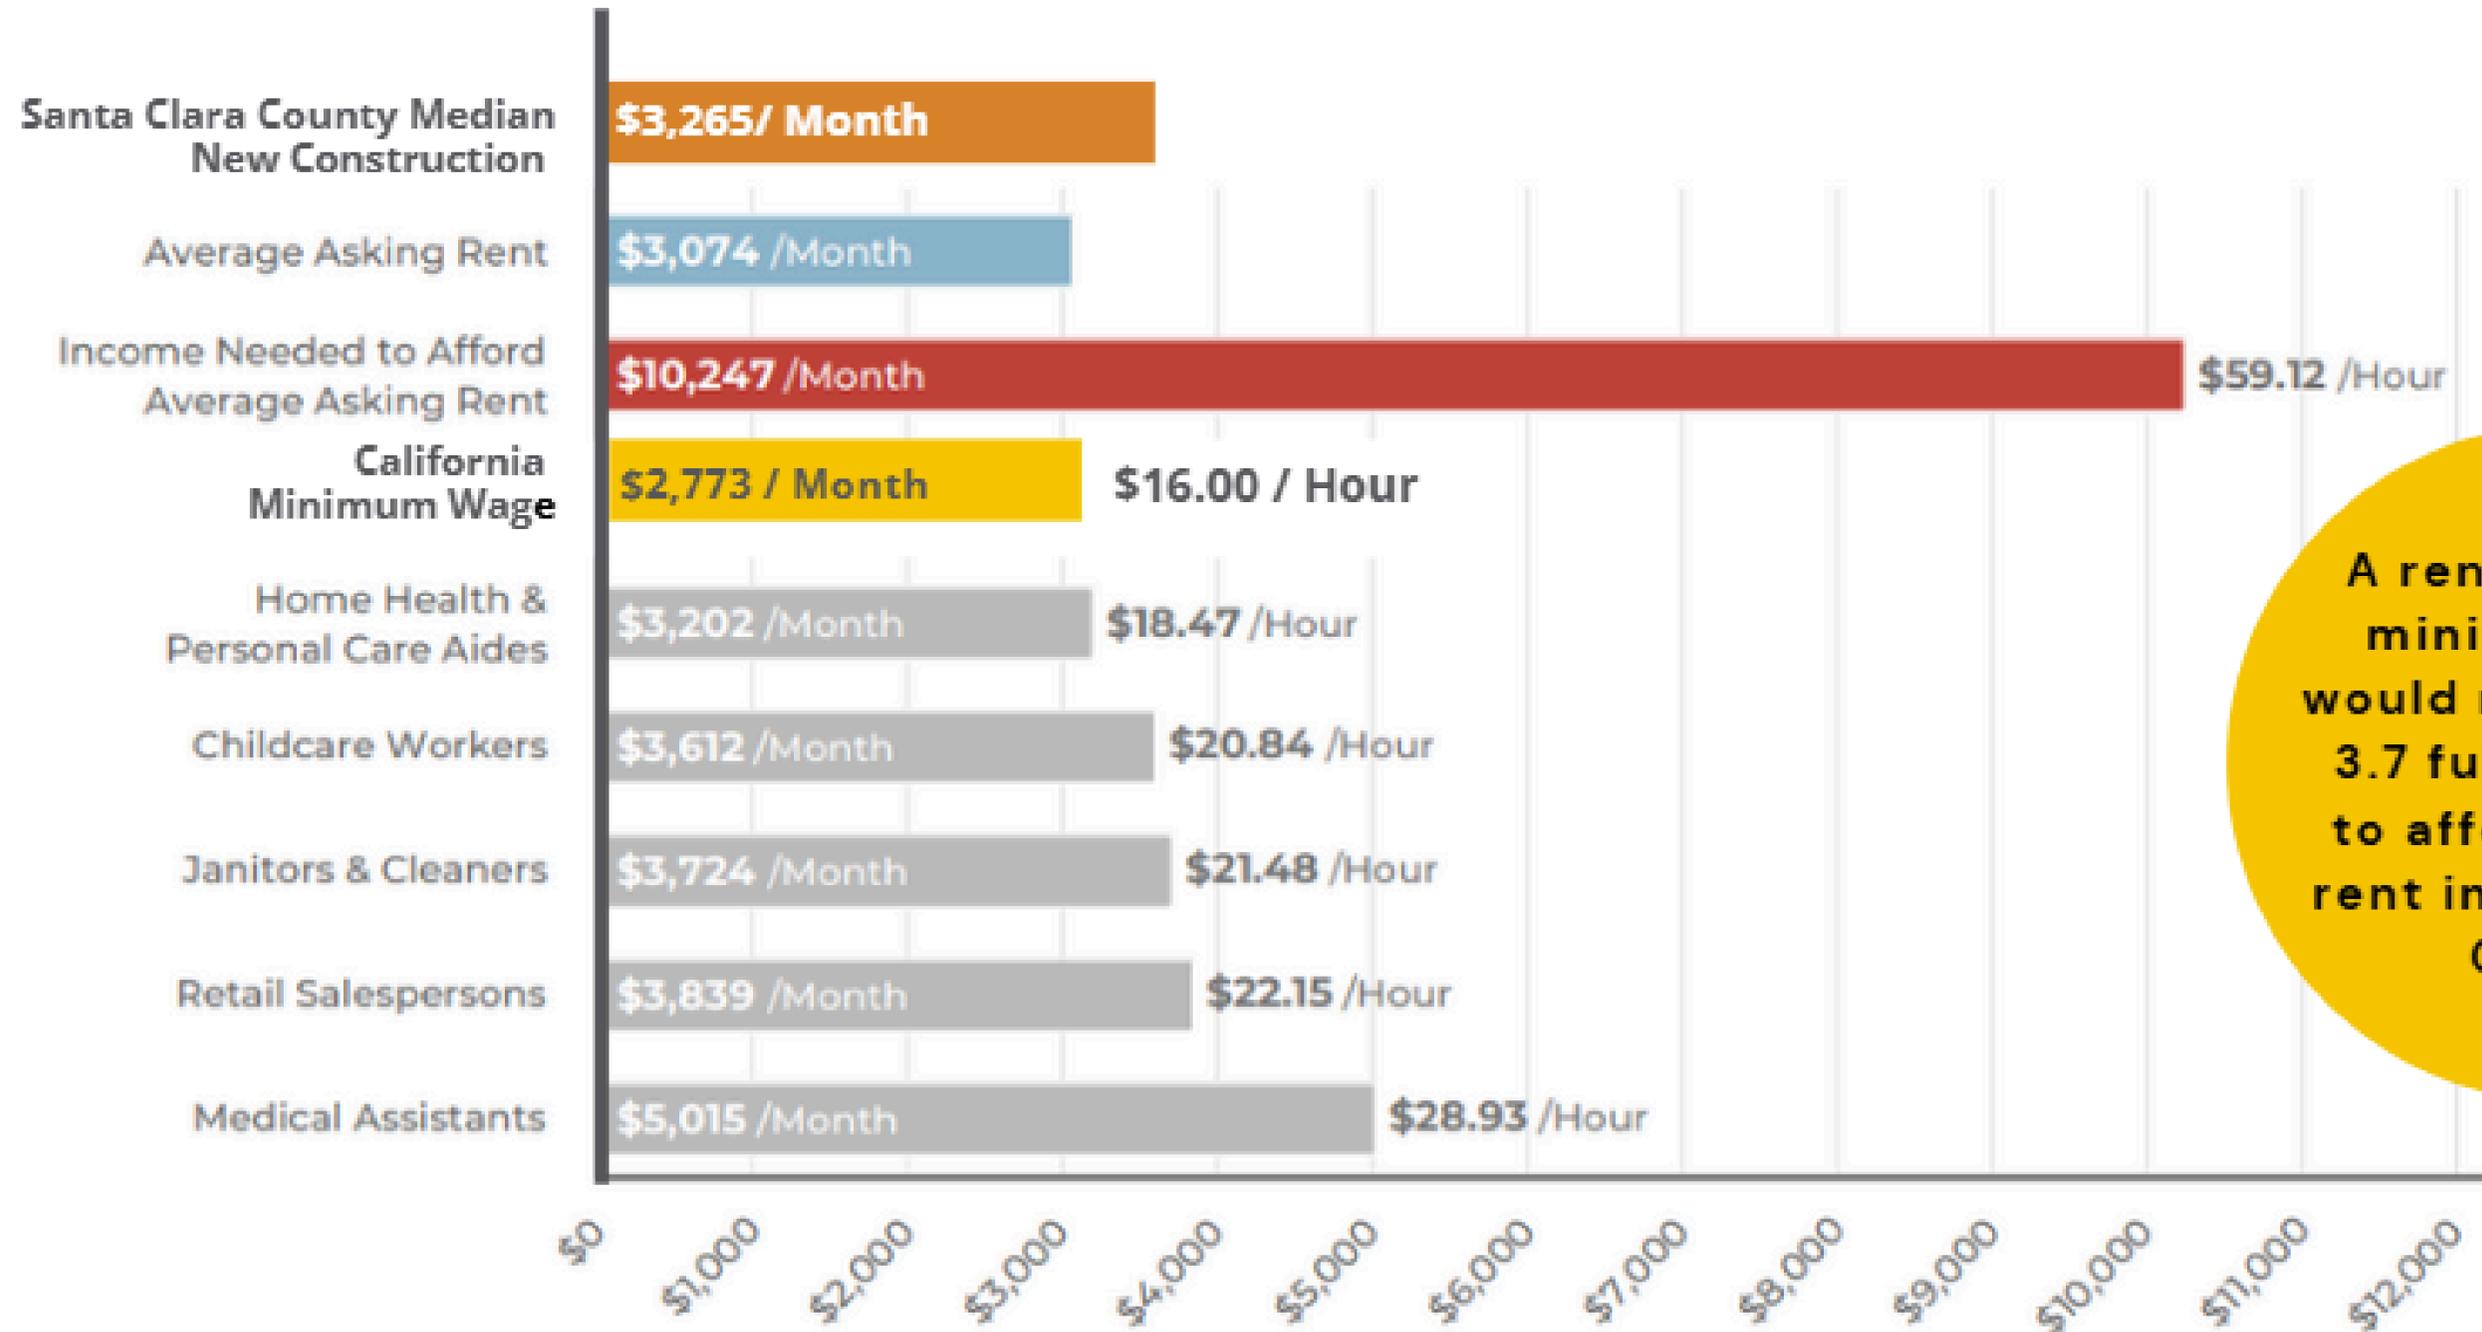

The fertility rate measures the number of children women are expected to have during their lifetime.

Impacts on Students of School Closures

- Lower test scores
- Worse attendance
- Behavioral problems
- Less likely to graduate from college
- Lower earnings as a young adult
- Disruption of support processes

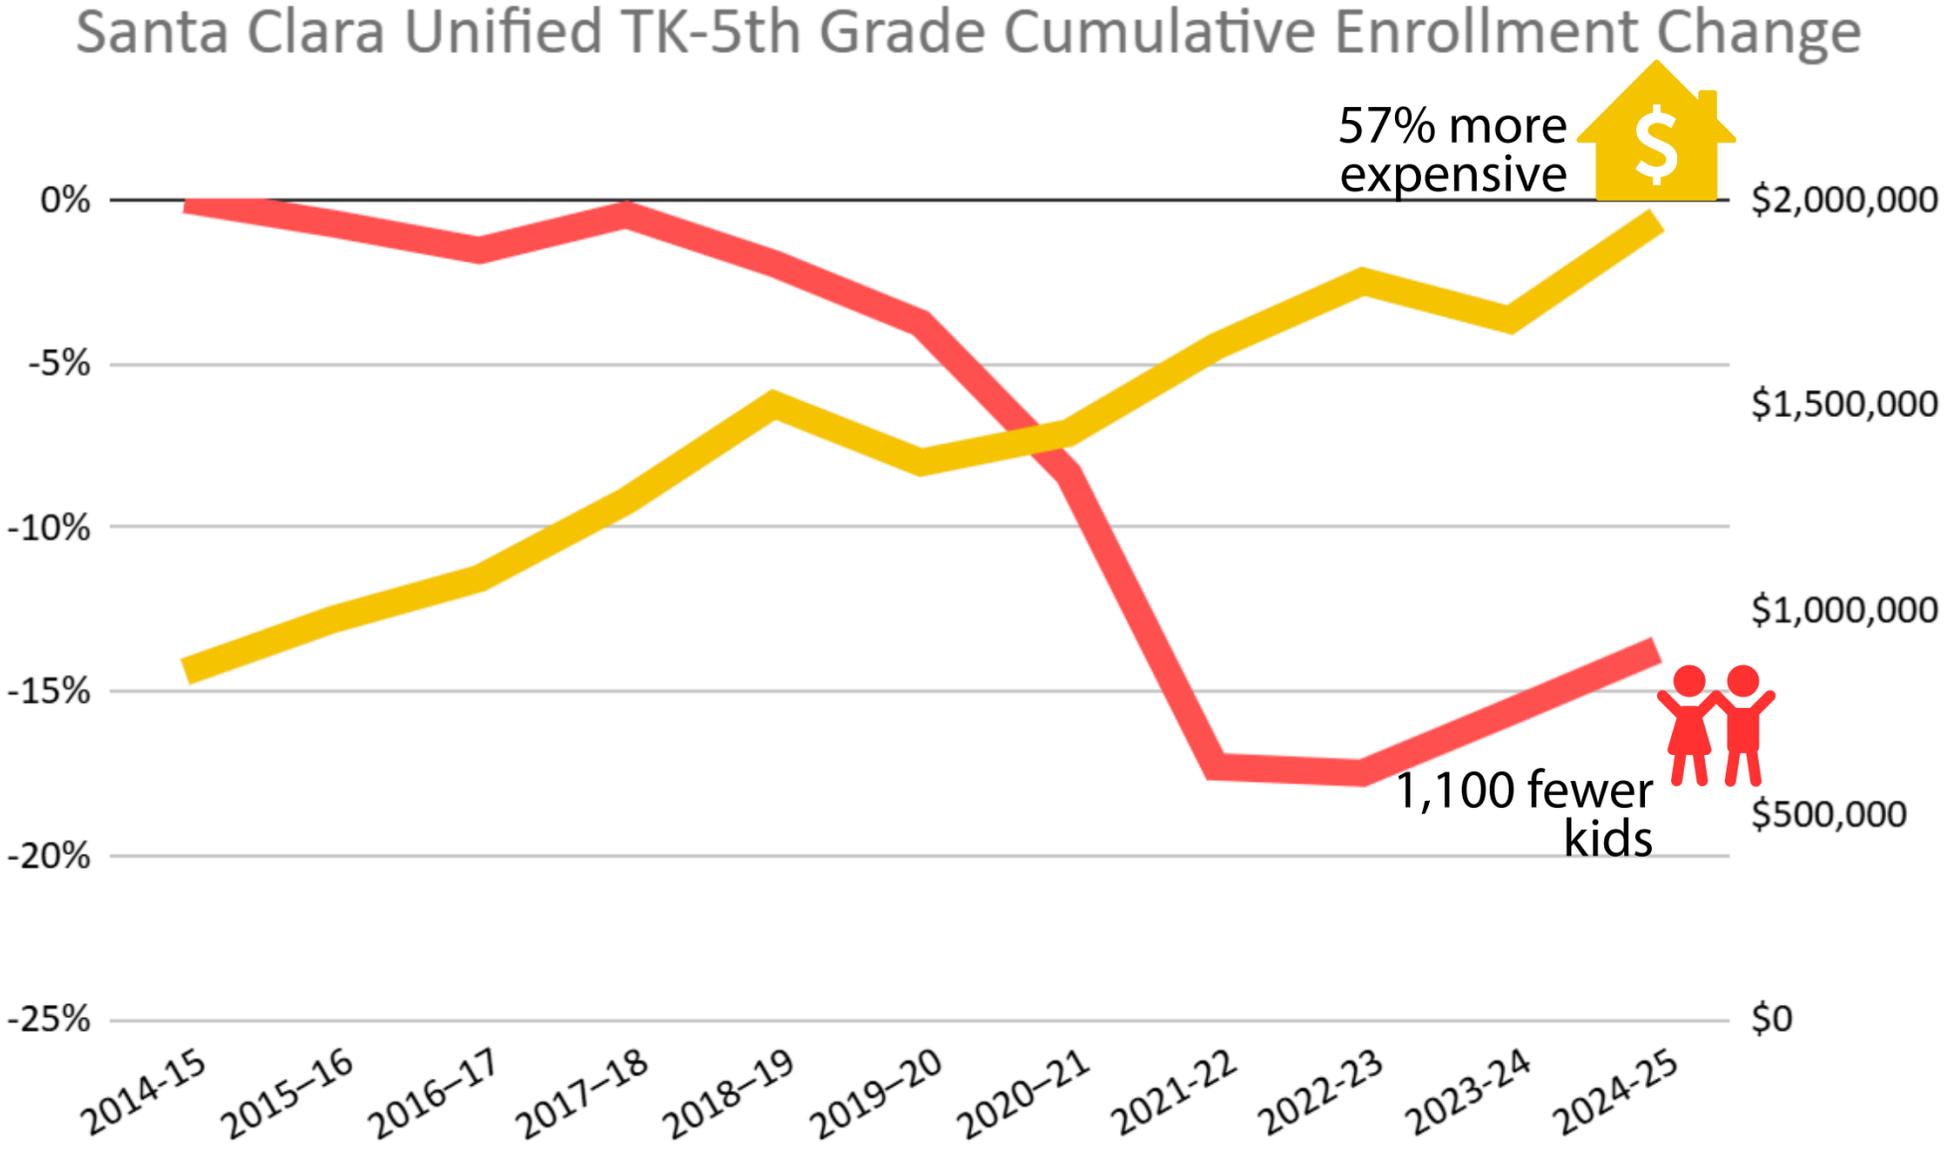

Housing is Critical for the **Wellbeing of Children & Schools**

Safe, stable, healthy, and affordable housing **sets kids up for learning**, and allows schools to **focus on what they do best.**

Strong, supported schools with the resources they need can be **anchors for communities** during the school day and outside of it.

Santa Clara Unified School District's Elementary Enrollment Falls as Home Prices Rise

Enrollment has fallen 14% over the last 11 years.

Median home prices in Santa Clara have soared by 57% over that same time to \$1,950,000.
